

Finance App User Guide

Purpose

Clear workflow and change guide for operations and admin staff.

Main Modules

- Purchase Requests (PR)
- Purchase Orders / Procure (PO)
- Petty Cash Reimbursements

Purchase Request Workflow

1. Requester creates PR as Draft.
2. Requester submits PR for approval.
3. Department HOD approves or rejects.
4. Finance approves or cancels.
5. Requester uploads signed document.
6. Finance closes the PR.

Purchase Order Workflow

1. Procurement creates PO from approved PR.
2. Procurement submits PO.
3. Generate or regenerate advance form when required.
4. For petty-cash method, upload supporting receipt.
5. Close PO:
 - Purchase-order method -> Closed
 - Petty-cash method -> Waiting Reimbursement

Petty Cash Workflow

1. Requester creates and submits petty cash reimbursement.
2. Department HOD approves or rejects.
3. Finance HOD approves or sends back.
4. Payables adds PV number(s).
5. System posts reimbursement and updates budgets/history.

Recent User-Facing Changes

- Null-safe email checks were added in petty cash rejection actions.
- Finance send-back rejection now notifies requester only.

- Workflow action visibility was refined by role and status.
- PR and PO lifecycle behavior was improved for smoother handoffs.

Daily Operations Checklist

1. Process all Submitted records first.
2. Confirm owner/role before approval.
3. Verify required documents before close.
4. Confirm final status transition after each action.
5. Escalate blocked records with module + record ID.

Change Log Note

This PDF was generated from current workflow configuration in the codebase.
